System Development

# Jerry Morris

Building cloud systems and AI in the education sphere.  
Littleton, Colorado

## Summary

I have a strong Web Development and Automation background as well as recent experience with AWS cloud systems and AI technologies.

---

## Experience

### MoYa Cloud LLC

#### Cloud Architect

January 2018 - Present

Nanchong, Sichuan, China

My wife and I began MoYa as an entity to do business with Chinese partners, the first and foremost of which is headmaster Meng at 汤姆叔叔 in Nanchong, Sichuan, China. We build Cloud systems in AWS geared towards education.

Our front ends are static pages compiled with Gatsby (React) and hosted in S3 buckets over CloudFront. Cognito handles user management and access. Lambda (Node.js) handles logic. We handle AI concerns through Amazon's Sagemaker, and we're beginning the work of adding 3D VR/AR environments with Amazon's Sumerian.

### Apex Systems

#### Software Engineer

October 2017 - January 2018 (4 months)

Greater Salt Lake City Area

During my time working through Apex Systems, I assisted in the development of a Bayesian smart portal to access various company resources. My role was in creating learning algorithms, front end tools, and integrating with pre-existing systems.

### Hospicelink

3 years 4 months

#### Application Developer

October 2015 - May 2017 (1 year 8 months)

Birmingham, Alabama Area

Full stack developer for WebUI, WCF Services, and reporting.

#### QA Analyst

February 2014 - October 2015 (1 year 9 months)

Birmingham, Alabama Area

Dedicated QA resource at local company that connects medical suppliers with Hospice care providers.

#### SuccessEHS

##### QA Specialist

October 2012 - January 2014 (1 year 4 months)

Tested thoroughly and with ingenuity to ensure the software was to the highest possible standard before shipping it out. Also worked with Product Managers to design improvements.

#### Foodimentary

##### Web Designer

January 2009 - October 2012 (3 years 10 months)

Helped manage social media marketing and managed all technical aspects of the web entity Foodimentary.com. During this time, I worked heavily with Wordpress. I learned a great deal about CSS and PHP while working through various issues. I also learned a lot about SSH, which made it extremely easy to make small changes to the Wordpress software to fit the needs of my boss. I also did a great deal of graphic design work here.

#### University of Alabama at Birmingham

##### Lab Technician

January 2009 - October 2012 (3 years 10 months)

Birmingham, Alabama Area

Repairing and maintaining faculty and lab equipment for the education department at UAB.

---

## Education

#### University of Alabama at Birmingham

BS, Mathematics · (2006 - 2011)
